## Safety notes

### Read Instructions!

Before working with this unit, read these instructions carefully and completely. Make sure that you have understood all the information!  
This unit complies with UL1310\* for the requirements of NEC Class 2 power only.

### Disconnect system from supply network

Before any installation, maintenance or modification work: Disconnect your system from the supply network. Ensure that it cannot be re-connected inadvertently!

### Before start of operation

#### Ensure appropriate installation

**Warning! Improper installation / operation impair safety and result in operational difficulties or complete failure of the unit. The unit must be installed and put into service appropriately by qualified personnel. Compliance with the relevant regulations must be ensured. Before operation is begun the following conditions must be ensured, in particular:**

- Connection to main power supply in compliance with VDE01000 and EN50178.
- With stranded wires: all strands must be secured in the terminal blocks (potential danger of short circuit).
- Unit and power supply cables must be properly fused; if necessary a manually controlled disconnecting element must be used to disengage from supply mains.
- All output lines must be rated for the power supply output current and must be connected with the correct polarity.
- Sufficient air-cooling must be ensured.
- Pollution Degree 2 environment.

### In operation: No modifications!

As long as the unit is in operation: do not modify the installation! The same applies also to the secondary side. Risk of electric arcs and electric shock (fatal)!

**Only connect/disconnect when the power is off!**

### Convection cooling (See Fig. 1)

**Do not cover** any ventilation holes!  
**Leave sufficient space** around the unit **for cooling!**

### Warning: High voltage! Store energy!

The unit contains unprotected conductors carrying a lethal high voltage, and components storing substantial amounts of energy. Improper handling may result in an electric shock or serious burn!

- The unit must not be opened except appropriately trained personnel!
- Do not introduce any object into the unit!
- Keep away from fire and water!

## Installation

### Mounting (See Fig. 1)

Permissible mounting position: keep ventilation holes clear, leave space for cooling! Recommended to have 25mm free space at all sides:

### Snap on support rail (See Fig. 2)

- Tilt the unit slightly rearwards.
- Fit the unit over top hat rail.
- Slide it downward until it hits the stop.
- Press against the bottom front side for locking.
- Shake the unit slightly to check the locking action.

### Connection (See Fig. 3)

- Use only commercial cables designed for the indicated voltage and current values!
- With flexible cables: make sure that all stranded cable are secured in the terminal.
- Ensure proper polarity at output terminals!

### Removal from DIN Rail (See Fig. 4)

Push the slider downwards (unlock). Gently lift lower front edge of the unit (tipping) and remove.

## Technical Data

 All specifications are typical at nominal line, full load, 25°C; Unless otherwise specified.

Description	Model No.				
	DSP100-05	DSP100-12	DSP100-15	DSP100-24	DSP100-24/C2
<b>Input</b>					
Rated input Voltage	100Vac ~ 240 Vac				
AC Voltage Range	90Vac ~ 264Vac				
DC Voltage Range	120-375 Vdc				
Frequency	47-63Hz				
Rated input Current (max)	1500mA	1700mA		2200mA	
Inrush Current (115Vac/230Vac)	< 30A / < 60A				
Efficiency (Typ)	>80%	>82%	>85%	>85%	>85%
Power Factor Correction	meet EN61000-3-2 class A				
<b>Output</b>					
Overvoltage protection	120-145%				
Line regulation	<1.0 %				
Load regulation	<1.0 %				
Time & temp. Drift	<1.0 %				
DC ON indicate(Green LED)	>3V	>9V	>11V	>20V	>18V
Ripple	<50mVp-p				
Nominal Current	12A	6A	5A	4.2A	3.8A
Rated over load protection	110%~150% (DSP100-24/C2 102-108%)				
Current Limit	Fold Forward (Current rises, voltage drops to maintain constant power during overload)				
Holdup Time(230Vac)	> 30ms				
<b>General</b>					
Temperature	Storage : -25 to + 85 °C , Operation : -25 to + 71 °C				
Derating	2.5% / °C from 55°C to 71°C				
Humidity	20%~90% RH				
Case	Plastic				
MAX. Required free space	25mm in all sides				
Dimensions	3.58 x 3.54 x 2.23				
H x W x D inches (mm)	(91 x 89.9 x 56.8)				
Weight	320g				
<b>Approvals And Standard</b>					
UL / cUL	UL508 Listed UL1310 Listed Class 2 power (-24/C2 model) , UL 60950-1 Recognized				
TUV	EN60950-1				
CE	EN61000-6-3, EN55022 Class A				
	EN61000-3-2, EN61000-3-3				
	EN61000-6-2, EN55024, EN61000-4-2, EN61000-4-3, EN61000-4-4				
	EN61000-4-5, EN61000-4-6, EN61000-4-8, EN61000-4-11				

\* If the units are to be installed as Direct Plug-in Power Units and full compliance to UL1310 is required, the units must be installed in an airtight distributor box that conforms to the requirements of UL1310.

Warning: This is a Class A product. In a residential, commercial or light industrial environment it may cause radio interference. This product is not intended to be installed in a residential environment; in a commercial and light industrial environment with connection to the public mains supply, the user may be required to take adequate measures to reduce interference.
